

## **FASTBOND™**

FastBond™ is a highly advanced and flexible tool providing customs brokers unprecedented control over your workflow and timing of critical information. Using FastBond™ increases efficiencies, reduces potential error data during the issuing process and ultimately supports client retention. Functional and intuitive FastBond™ features include:

### **eBOND**

On January 3, 2015, CBP deployed a fully functioning electronic bond (eBond) filing system. Roanoke was one of the first sureties to submit an eBond through FastBond™! Using FastBond™, customers can file eBonds with CBP in as few as 3-5 seconds. FastBond™ is capable of connecting with customers' software to eliminate the re-keying of bond data. It also contains the broker's bond issuing authority and automatically routes any bond over the broker's authority to Roanoke's underwriting system.

### **ENHANCED REPORTING OPTIONS**

Always at the forefront of innovation, Roanoke Trade's latest version of FastBond™ delivers reporting options giving managers optimum control over and immediate access to their vital data. These options extend beyond traditional reporting capabilities and transform FastBond™ into a powerful management tool including:

- Comprehensive filer code reports for entries and claims
- Management level access specifically designed for managers who oversee the bond issuance process
- On demand standard system reports for entries, liquidated damages and increased duty bills
- Scheduled custom reports to your specifications

### **E-NOTIFICATIONS PAGE**

Managers can now control the flow of critical information to designated recipients for specific bond-related documents. This feature eliminates delays in getting the right information to the right person at the right time. These documents include:

- Copies of approved bond documents received from CBP
- Critical e-notifications when your bonds have reached saturation levels of 90% and then again at 100%
- Time-sensitive increase notices from CBP

### **CONTINUAL PROGRESSION OF FASTBOND™**

Look for new releases coming soon!
